

School of Behavioral and Brain Sciences

Cognitive Science (BS)

Cognitive Science is the study of complex information processing in humans and machines and includes the multidisciplinary study of biological and artificial systems. Important components of cognitive science include areas of research such as: cognitive-neuroscience, brain-imaging studies of perceptual and cognitive processing, Human-Computer Interaction (HCI), Artificial Intelligence (AI) and machine learning, computational neuroscience, and mathematical psychology. The field of cognitive science draws from diverse approaches to understanding complex information processing systems, including research from experimental psychology, neuroscience, linguistics, philosophy, computer science, mathematics, and engineering.

The Cognitive Science program in the School of Behavioral and Brain Sciences at UT Dallas consists of four concentration areas: (1) Psychology, (2) Neuroscience, (3) Human-Computer Interaction, and (4) Intelligent Systems (AI)/Computational Modeling.

Cognitive Science Majors select core upper-division coursework from 2 of these 4 concentration areas to generate multidisciplinary areas of focus. In addition to providing a sound preparation for graduate work in Cognitive Science and related areas, the Cognitive Science major is an ideal choice for students pursuing careers that combine interests in neuroscience, cognition, mathematics, and computer science. There are exciting career prospects in both industry and academics for the Cognitive Science major.

Cognitive-Neuroscience Careers. Students whose focus area is cognitive-neuroscience will be well prepared for the pursuit of graduate degrees and careers associated with: medicine, clinical neuropsychology, brain-imaging technology, intraoperative neurophysiological monitoring, and evaluation of bionic/prosthetic technology (e.g., cochlear implants and artificial limbs). Students interested in Cognitive-Neuroscience career opportunities typically choose their coursework from the concentration areas of both Psychology and Neuroscience.

Artificial Intelligence and Machine Learning Careers. The areas of Artificial Intelligence and Machine Learning are concerned with the problem of the design and evaluation of artificially intelligent systems. Examples of artificially intelligent systems include: web search engines, speech recognition algorithms, computer-based natural language understanding, robotics, computer vision, smart algorithms which support automatized data mining, the design of intelligent entities in computer games, as well as bionic and prosthetic technology development and evaluation (such as cochlear implant technology). Students interested in career opportunities in this area should choose their core coursework from the AI/Computational Modeling concentration area and one of the other three concentration areas.

Computational Neuroscience and Mathematical Psychology Careers. Computational neuroscience

and mathematical psychology are areas of study concerned with the development of mathematical and simulation models for the purpose of advancing theory in the behavioral and brain sciences. Students interested in careers in computational neuroscience would choose their core coursework from the concentration areas of both Neuroscience and AI/Computational Modeling. Students interested in the area of mathematical psychology would choose their core coursework from the AI/Computational Modeling concentration area and one of the other three concentration areas.

Usability Engineering and User Experience (UX) Careers. Students whose focus area is Human-Computer Interaction (HCI), are prepared to pursue careers in the areas of usability engineering and user-experience (UX) design. Such careers involve the evaluation and design of human-computer interfaces such as website and software graphical user interfaces (GUIs), smartphone interfaces, and voice-user interfaces (VUIs). Students interested in Usability Engineering and User Experience (UX) Research opportunities should choose their core coursework from the Psychology/HCI concentration area and include one or more HCI courses. Students interested in the area of user-experience (UX) design typically choose their core coursework from the concentration areas of Human-Computer Interaction and Psychology.

Medical and Dental School Career Paths. The Cognitive Science major is an excellent choice for students interested in preparation for medical or dental graduate study. Cognitive science students receive training in areas such as biology, chemistry, psychology, and mathematics. Freshman and sophomore students interested in pre-med careers should identify basic, required, and recommended subject requirements for their top choices in medical schools. This information should then be used to design an appropriate cognitive science curriculum with their undergraduate Cognitive Science advisor. Students interested in Health Services career paths should choose the Neuroscience concentration area and one of the other three concentration areas.

Bachelor of Science in Cognitive Science

Faculty

FACG> bbs-cognitive-science-bs

Professors: Hervé Abdi, Peter Assmann, Sandra B. Chapman, Gregory Dussor, Julia Evans, Francesca Filbey, Richard M. Golden, John Hart Jr., William F. Katz, Michael P. Kilgard, Daniel Krawczyk, Alice J. O'Toole, Denise Park, Theodore Price, Robert L. Rennaker II, Michael D. Rugg, Steven Small

Associate Professors: Chandramallika Basak, Kristen Kennedy, Sven Kroener, Mandy J. Maguire, Christa McIntyre Rodriguez, Karen Rodriguez, Gagan Wig

Assistant Professors: Michael Burton, Kendra Seaman, Catherine Thorn

Professors of Instruction: Salena Brody, Karen Huxtable-Jester, Nancy Juhn

Associate Professors of Instruction: Meridith Grant, Steven McWilliams, Gayle Schwark, Rukhsana Sultana

Assistant Professors of Instruction: Siham Raboune, Anna Taylor

UT Dallas Affiliated Faculty: Robert Ackerman, Shayla C. Holub, Heidi Kane, Candice M. Mills, Jackie Nelson, Amy Pinkham, Karen Prager, Pamela R. Rollins, John Santrock, Noah J. Sasson, Melanie J. Spence, Linda M. Thibodeau, Hanna K. Ulatowska, Andrea Warner-Czyz

I. Core Curriculum Requirements: 42 semester credit hours¹

Communication: 6 semester credit hours

Select any 6 semester credit hours from [Communication Core](#) courses (see advisor)

Mathematics: 3 semester credit hours

[MATH 2417](#) Calculus I²

or [MATH 2413](#) Differential Calculus² (Note: [MATH 2417](#) is recommended)

Or select any 3 semester credit hours from [Mathematics Core](#) courses (see advisor)

Life and Physical Sciences: 6 semester credit hours

Select 6 semester credit hours from [Life and Physical Sciences Core](#) courses (see CGS advisor)

Language, Philosophy and Culture: 3 semester credit hours

Select 3 semester credit hours from [Language, Philosophy and Culture Core](#) courses

Creative Arts: 3 semester credit hours

Select 3 semester credit hours from [Creative Arts Core](#) courses

American History: 6 semester credit hours

Select 6 semester credit hours from [American History Core](#) courses

Government/Political Science: 6 semester credit hours

Select 6 semester credit hours from [Government/Political Science Core](#) courses

Social and Behavioral Sciences: 3 semester credit hours

[PSY 2301](#) Introduction to Psychology²

Or select any 3 semester credit hours from [Social and Behavioral Sciences Core](#) courses (see advisor)

Component Area Option: 6 semester credit hours

[MATH 2419](#) Calculus II²

or [MATH 2414](#) Integral Calculus² (Note: [MATH 2419](#) is recommended)

[CGS 2301](#) Cognitive Science²

Or select any 6 semester credit hours from [Component Area Option Core](#) courses (see advisor)

II. Major Requirements: 48-57 semester credit hours

Major Preparatory Courses:

The following are required for all concentration areas (12 semester credit hours beyond Core Curriculum):

[CGS 2301](#) Cognitive Science²

[CS 1337](#) Computer Science I

[MATH 2417](#) Calculus I²

or [MATH 2413](#) Differential Calculus²

[MATH 2419](#) Calculus II²

or [MATH 2414](#) Integral Calculus²

[MATH 2418](#) Linear Algebra

[PSY 2301](#) Introduction to Psychology²

[PSY 2317](#) Statistics for Psychology

or [CS 3341](#) Probability and Statistics in Computer Science and Software Engineering

Recommended Additional Preparatory Courses for Intelligent Systems (AI)/Computational Modeling: (10 semester credit hours)

The courses listed below are not required for all students specializing in the Intelligent Systems

(AI)/Computational Modeling area but are prerequisites for some courses in this area.

[CS 1436](#) Programming Fundamentals

[CS 2305](#) Discrete Mathematics for Computing I

[CS 2336](#) Computer Science II

Recommended Additional Preparatory Courses for Neuroscience Area: (14 semester credit hours)

The courses listed below are not required for all students specializing in the Neuroscience area but are prerequisites for some courses in this area.

[BIOL 2111](#) Introduction to Modern Biology Workshop I

[BIOL 2281](#) Introductory Biology Laboratory

[BIOL 2311](#) Introduction to Modern Biology I²

[CHEM 1111](#) General Chemistry Laboratory I

[CHEM 1311](#) General Chemistry I²

[CHEM 1112](#) General Chemistry Laboratory II

[CHEM 1312](#) General Chemistry II

Recommended Additional Preparatory Courses for Human-Computer Interaction Area: (12 semester credit hours)

The courses listed below are not required for all students specializing in the Human-Computer Interaction area but are prerequisites for some courses in this area.

[ATCM 2301](#) Digital Art and Design Foundations

[ATCM 2302](#) Design I

[ATCM 2335](#) Internet Studio I

[ANGM 2310](#) Animation and Game Fundamentals

Major Core Courses: 12 semester credit hours

The following are required for all concentration areas:

[CGS 3361](#) Cognitive Psychology

[NSC 3361](#) Introduction to Neuroscience

[PSY 3392](#) Research Design and Analysis

[CGS 3340](#) Experimental Projects in Cognitive Science

or [PSY 3393](#) Experimental Projects in Psychology

Major Related Courses: 24 semester credit hours

Select 4 courses each from 2 of the following 4 Concentration Areas.

Psychology Concentration Area Courses

Select 12 semester credit hours from the list of courses below:

[CGS 3325](#) History of Psychology

[CGS 4359](#) Cognitive Neuroscience

[CGS 4362](#) Perception

[PSY 3331](#) Social Psychology

[PSY 4343](#) Adult Psychopathology

[PSY 2314](#) Lifespan Development

[PSY 3310](#) Child Development

[PSY 3362](#) Cognitive Development

[PSY 3339](#) Educational Psychology

[PSY 4323](#) Cultural Diversity and Psychology

[PSY 4385](#) Neuropsychology

[CGS 4320](#) Psychology of Reasoning

Human-Computer Interaction Concentration Area Courses

Select 12 semester credit hours from the list of courses below:

[CGS 4352](#) Introduction to Human-Computer Interaction

[CGS 4353](#) Qualitative UX Research

[CGS 4321](#) Quantitative UX Research

[CGS 3346](#) PYTHON for Biobehavioral Data Analysis

[ANGM 3365](#) Game Design I

[ATCM 3337](#) Interaction Design I

[ATCM 3371](#) User Experience Design for Games

[ATCM 3380](#) Media Psychology

Neuroscience Concentration Area Courses

Select 12 semester credit hours from the list of courses below:

[NSC 4352](#) Cellular Neuroscience

[NSC 4354](#) Integrative Neuroscience

[NSC 4356](#) Neurophysiology

[NSC 4366](#) Neuroanatomy

[NSC 4363](#) Neuropharmacology

[NSC 4367](#) Developmental Neurobiology

[NSC 4359](#) Cognitive Neuroscience

[NSC 4353](#) Neuroscience Laboratory Methods

[NSC 4357](#) Neurobiology of Learning and Memory

[NSC 4362](#) Molecular Neuroscience

[NSC 4371](#) Neural Plasticity

[NSC 4373](#) Sensory Neuroscience

[NSC 4385](#) Neuropsychology

[NSC 4351](#) Medical Neuroscience

[NSC 4358](#) Neuroscience of Pain

[NSC 4372](#) Neuroimmunology

[NSC 4350](#) Medical Neuropathology

[NSC 4382](#) Neurobiology of Emotion

Intelligent Systems (AI)/Computational Modeling Concentration Area Courses

Select 12 semester credit hours from the list of courses below:

[CS 3341](#) Probability and Statistics in Computer Science and Software Engineering³

or [SE 3341](#) Probability and Statistics in Computer Science and Software Engineering³

[CGS 3342](#) Cognitive and Neural Modeling Laboratory⁴

[CGS 4314](#) Intelligent Systems Analysis⁴

[CGS 4315](#) Intelligent Systems Design⁴

[CS 3345](#) Data Structures and Foundations of Algorithmic Analysis

[CGS 4321](#) Quantitative UX Research

[CGS 3346](#) PYTHON for Biobehavioral Data Analysis

[CS 4365](#) Artificial Intelligence

[CS 4375](#) Introduction to Machine Learning

[CS 4391](#) Introduction to Computer Vision

[CS 4395](#) Human Language Technologies

[CS 4372](#) Computational Methods for Data Scientists

III. Elective Requirements: 24-30 semester credit hours

Free Electives:

24 semester credit hours for Intelligent Systems (AI)/Computational Modeling Concentration Area

30 semester credit hours for the other three concentrations

Students are encouraged to explore areas of concentration in Cognitive Science, Psychology, and Neuroscience as well as explore interests outside the field. In addition, advanced CGS students in good academic standing may request permission from the Cognitive Science Program Head to take graduate Applied Cognition and Neuroscience coursework (ACN prefix) to fulfill some of the elective course requirements.

The plan must include sufficient upper-division courses to total 45 upper-division semester credit hours.

Incoming freshmen must enroll and complete requirements of [BBSU 1100](#).

Fast Track Baccalaureate/Master's Degrees

UT Dallas undergraduate students with strong academic records who intend to pursue a master's degree in Applied Cognition and Neuroscience at UT Dallas may consider an accelerated undergraduate-graduate plan of study. If accepted into the program, students may take up to 15 semester credit hours of graduate courses that may be used to complete the bachelor's degree and also to satisfy requirements for the Master's degree. Students must maintain a 3.000 grade point average and earn grades of B or better in the graduate courses taken.

Students should apply for Fast Track admission in the semester they reach 90 semester credit hours. To qualify for application, undergraduate students must have completed at least 18 semester credit hours in major core courses at UT Dallas. To be eligible for Fast Track admission, students must have completed at least 90 semester credit hours toward a baccalaureate degree, completed a minimum of 36 hours of general education core curriculum classes, and meet program admission requirements. Apply to the Fast Track program through the Applied Cognition and Neuroscience Program Office. Students should consult with a graduate advisor regarding admissions criteria and plans of study at the beginning of their junior year.

Minors

Students must complete 18 semester credit hours including 9 required semester credit hours of foundation coursework and 9 semester credit hours of guided electives. At least 12 semester credit hours must be upper-division courses, of which at least 9 semester credit hours must have been completed at UT Dallas.

Minor in Cognitive Science

18 semester credit hours

Students who are not majoring in Cognitive Science may minor in Cognitive Science by completing 18 semester credit hours. Students who take a minor will be expected to meet the normal prerequisites in courses making up the minor, and should maintain a minimum GPA of 2.000 on a 4.00 scale (C average). At least 12 of the 18 semester credit hours required by the minor in Cognitive Science must be satisfied by completing four upper-division courses from one of the four different Cognitive Science concentration areas. In addition, 9 of the 18 semester credit hours required for the minor in Cognitive Science must have a Cognitive Science (CGS), Psychology (PSY), or Neuroscience (NSC) prefix and be upper-division courses. No semester credit hours may be used to satisfy both major and minor requirements; however, free elective semester credit hours or major preparatory classes may be used to satisfy the minor. At least one-third of the semester credit hours for a minor must be taken at UT Dallas.

1. Curriculum Requirements can be fulfilled by other approved courses from institutions of higher education. The courses listed are recommended as the most efficient way to satisfy both Core

Curriculum and Major Requirements at UT Dallas.

2. A required Preparatory course that also fulfills a Core Curriculum requirement. Fourteen semester credit hours (14) are counted in Core Curriculum.
3. Note that either SE 3341 or STAT 3341 may be used as an equivalent course for CS 3341 for all Cognitive Science program requirements as well as all Cognitive Science course prerequisites.
4. Taught only once every other year.
