

School of Natural Sciences and Mathematics

Department of Sustainable Earth Systems Sciences

Geosciences (BS)

Attaining a fundamental understanding of Earth's natural systems, past and present, and their coupled nonlinear relationships, is a primary goal of geosciences. An earth scientist studies the Earth's structure, composition and evolution, its minerals, rocks, fossils, sediments and fluids, and investigates the geological, physical, and biogeochemical processes occurring within the Earth and on its surface.

Professional career opportunities in earth sciences are available in the environmental, energy, mineral, and groundwater resource industries, and in government, educational, and research organizations related to these fields. In addition, many occupations concerned with business, management, economics, law, policy, and engineering, require a background in earth sciences.

Specific degree plans will be formulated by the undergraduate advisor in the Department of Sustainable Earth Systems Sciences. Changing circumstances may require changes to the degree plans.

Bachelor of Science in Geosciences

[Degree Requirements](#) (120 semester credit hours)

Faculty

FACG> nsm-geosciences-bs

Professors: David Hyndman, David Lumley, Robert J. Stern

Associate Professor: Thomas Brikowski

Assistant Professors: Kristina Butler, Nadine Igonin, Zachary Sickmann, Xian Wu, Qian Zhao, Yujie Zheng

Professors Emeriti: John F. Ferguson, John W. Geissman, William I. Manton, George A. McMechan

Professors of Instruction: Ignacio Pujana

Associate Professor of Instruction: William R. Griffin

Assistant Professor of Instruction: Steven Pirouz

I. Core Curriculum Requirements: 42 semester credit hours¹

Communication: 6 semester credit hours

Select any 6 semester credit hours from [Communication Core](#) courses (see advisor)

Mathematics: 3 semester credit hours

[MATH 2413](#) Differential Calculus^{2,3}

or [MATH 2417](#) Calculus I^{2,3}

Or select any 3 semester credit hours from [Mathematics Core](#) courses (see advisor)

Life and Physical Sciences: 6 semester credit hours

[CHEM 1311](#) General Chemistry I²

or [CHEM 1315](#) Honors Freshman Chemistry I²

[CHEM 1312](#) General Chemistry II²

or [CHEM 1316](#) Honors Freshman Chemistry II²

Or select any 6 semester credit hours from [Life and Physical Sciences Core](#) courses (see advisor)

Language, Philosophy and Culture: 3 semester credit hours

Select any 3 semester credit hours from [Language, Philosophy and Culture Core](#) courses (see advisor)

Creative Arts: 3 semester credit hours

Select any 3 semester credit hours from [Creative Arts Core](#) courses (see advisor)

American History: 6 semester credit hours

Select any 6 semester credit hours from [American History Core](#) courses (see advisor)

Government/Political Science: 6 semester credit hours

Select any 6 semester credit hours from [Government/Political Science Core](#) courses (see advisor)

Social and Behavioral Sciences: 3 semester credit hours

Select any 3 semester credit hours from [Social and Behavioral Sciences Core](#) courses

Component Area Option: 6 semester credit hours

[GEOS 1303](#) Physical Geology

[GEOS 1304](#) History of Earth and Life

Or select any 6 semester credit hours from [Component Area Option Core](#) courses (see advisor)

II. Major Requirements: 62-75 semester credit hours

Major Preparatory Courses: 17-18 semester credit hours beyond Core Curriculum

Prerequisite courses to be completed before enrolling in upper-division GEOS courses.

[CHEM 1111](#) General Chemistry Laboratory I

or [CHEM 1115](#) Honors Freshman Chemistry Laboratory I

[CHEM 1112](#) General Chemistry Laboratory II

or [CHEM 1116](#) Honors Freshman Chemistry Laboratory II

[CHEM 1311](#) General Chemistry I₂

or [CHEM 1315](#) Honors Freshman Chemistry I₂

[CHEM 1312](#) General Chemistry II₂

or [CHEM 1316](#) Honors Freshman Chemistry II₂

[GEOS 1303](#) Physical Geology₂

[GEOS 1304](#) History of Earth and Life₂

[GEOS 1103](#) Physical Geology Laboratory

[GEOS 1104](#) History of Earth and Life Laboratory

[MATH 2413](#) Differential Calculus_{2,3}

or [MATH 2417](#) Calculus I_{2,3}

[MATH 2414](#) Integral Calculus

or [MATH 2419](#) Calculus II

[PHYS 2325](#) Mechanics

and [PHYS 2125](#) Physics Laboratory I

or [PHYS 2421](#) Honors Physics I - Mechanics and Heat⁴

[PHYS 2326](#) Electromagnetism and Waves

or [PHYS 2422](#) Honors Physics II - Electromagnetism and Waves

[PHYS 2126](#) Physics Laboratory II

Major Core Courses: 31 semester credit hours

[GEOS 3300](#) Field Geology I (Summer Field Camp I)

[GEOS 3421](#) Stratigraphy and Sedimentology

[GEOS 3464](#) Earth Materials

[GEOS 3470](#) Structural Geology

[GEOS 3475](#) Geochemistry

[GEOS 4300](#) Field Geology II (Summer Field Camp II)

[GEOS 4320](#) The Physics of the Solid Earth

[GEOS 4390](#) Communication in Earth Sciences

And select one course from the following:

[GEOS 3310](#) Environmental Geophysics

[GEOS 4395](#) Remote Sensing Geophysics

Students may select either the Geology Option or the Geophysics Option.

A. Geology Option: 14-15 semester credit hours

[GEOS 3434](#) Paleobiology

[GEOS 4322](#) The Earth System

[GEOS 4430](#) Hydrogeology and Aqueous Geochemistry

And select one mathematics course from the following:

[GEOS 2351](#) Mathematics in the Earth Sciences

[ENGR 2300](#) Linear Algebra for Engineers

[MATH 2415](#) Calculus of Several Variables

[MATH 2418](#) Linear Algebra

[MATH 3351](#) Advanced Calculus

[PHYS 3330](#) Numerical Methods in Physics and Computational Techniques

[STAT 2332](#) Introductory Statistics for Life Sciences

[STAT 3355](#) Introduction to Data Analysis

B. Geophysics Option: 25-26 semester credit hours

[MATH 2418](#) Linear Algebra

[MATH 2420](#) Differential Equations with Applications

[MATH 3351](#) Advanced Calculus

[MATH 4362](#) Partial Differential Equations

[PHYS 3411](#) Theoretical Physics

[PHYS 3312](#) Classical Mechanics

[PHYS 3416](#) Electricity and Magnetism

III. Elective Requirements: 3-16 semester credit hours (14-16 semester credit hours for Geology Option; 3-5 semester credit hours for Geophysics Option)

Both lower- and upper-division courses may count as electives.

Students are strongly encouraged to consider taking GEOS graduate courses as free electives if they meet the fast-track requirements.

The plan must include sufficient upper-division courses to total 45 upper-division semester credit hours.

1. Curriculum Requirements can be fulfilled by other approved courses from institutions of higher

education. The courses listed are recommended as the most efficient way to satisfy both Core Curriculum and Major Requirements at UT Dallas.

2. A Major requirement that also fulfills a Core Curriculum requirement.
3. Three semester credit hours are counted to fulfill the Mathematics Core Requirement with the remaining semester credit hour to be counted under the major requirements.
4. Students who complete PHYS 2421 do not need to complete PHYS 2125.

NOTE> Please be advised, the UTeach section below feeds in from a separate page updated by the UTeach team. Any changes made to the UTeach section below will not be retained.

UTeach Option

The [UTeach option](#) may be added to either the BA or BS degree. UTeach Dallas Option degree plans are streamlined to allow students to complete both a rigorous Bachelor of Science or Bachelor of Arts degree and all coursework for middle or high school teacher certification in four years. Teaching Option degrees require deep content knowledge combined with courses grounded in the latest research on math and science education. While most graduates go on to classroom teaching, UTeach alums are also prepared to enter graduate school and to work in a discipline related industry.

Fast Track Baccalaureate/Master's Degrees

The Fast-Track program allows students with strong academic records to take selected graduate courses that may be applied toward the baccalaureate degree and be used to satisfy requirements for the master's degree. Interested students who intend to pursue a master's degree in Geosciences may apply for a Fast Track baccalaureate/master's plan of study via the Geosciences graduate advisor. The planned coursework must be coordinated with the Geosciences undergraduate advisor; the Geosciences graduate advisor should also be notified. A maximum of 15 semester credit hours may be applied under this program.

Minors

Students must take a minimum of 18 semester credit hours for the minor, 12 of which must be upper-division semester credit hours. Students who take a minor will be expected to meet the normal prerequisites in courses making up the minor, and should maintain a minimum GPA of 2.000 on a 4.00 scale (C average). Semester credit hours may not be used to satisfy both the major and minor requirements; however, free elective semester credit hours or major preparatory classes may be used to satisfy the minor.

For all minors in the School of Natural Sciences and Mathematics students must complete all

prerequisite sequences for required minor courses.

Minor in Geosciences

20 semester credit hours

Required lower-division courses: 8 semester credit hours

[GEOS 1103](#) Physical Geology Laboratory⁵

[GEOS 1104](#) History of Earth and Life Laboratory⁵

[GEOS 1303](#) Physical Geology⁵

[GEOS 1304](#) History of Earth and Life⁵

Upper-division courses: 12 semester credit hours

To be selected in consultation with Geosciences Undergraduate advisor

5. A prerequisite course to be completed before enrolling in upper-division GEOS core courses (GEOS 3300, GEOS 3421, GEOS 3434, GEOS 3464, GEOS 3470, GEOS 4300, GEOS 4320, GEOS 4322, and GEOS 4430).

Certificates

Certificate in Geophysics

12 semester credit hours

A Certificate in Geophysics is offered by the Department of Sustainable Earth Systems Sciences in the School of Natural Sciences and Mathematics.

The focus of the Certificate in Geophysics is to provide students with the opportunity to combine their existing knowledge with a strong foundation and understanding in Geophysics, which will open up exciting new job opportunities for their future careers in industry, government, and academia.

Admission Requirements

Undergraduate students who have completed prerequisite courses.

Certificate Requirements

Students must complete the following courses:

[GEOS 4320](#) The Physics of the Solid Earth

[GEOS 4395](#) Remote Sensing Geophysics

[GEOS 3310](#) Environmental Geophysics

Choose one course from the following:

[GEOS 2307](#) Digital Earth

[ISNS 2366](#) Global Climate Change

[PHYS 3380](#) Astronomy
