

School of Natural Sciences and Mathematics

The Biology Program at UT Dallas emphasizes the unifying molecular and cellular nature of organisms. At the center of the Biology undergraduate curriculum are the biochemical, genetic, and cell biology concepts and tools used to study the genes of prokaryotes and eukaryotes, to study the proteins and ribonucleic acids (RNA) encoded by these genes, and to study how the expression of these genes is regulated during the development and lifetimes of organisms. Molecular Biology represents a fusion of the four disciplines of biochemistry, biophysics, genetics, and cell biology. Modern biology requires a background in other disciplines such as chemistry, mathematics, physics, and computer sciences. Principles from these disciplines have to be merged to understand and apply new biotechnology and genetic engineering techniques. It is desirable for entering students to have a broad interest and background in the sciences.

Molecular Biology (BS)

A BS degree is offered in Molecular Biology. The BS degrees are intended as preparation for scientific careers in biology or careers in the health professions. Biology offers a streamlined double major with Business Administration or Criminology. [Accelerated BS/MS Fast Track programs](#) are available that provide the opportunity to partially satisfy the requirements of a master's degree while completing the bachelor's degree in Molecular Biology.

Major Related Courses: 12 semester credit hours⁷

12 semester credit hours upper-division approved molecular biology-related BIOL or CHEM electives

III. Elective Requirements: 7-9 semester credit hours

Free Electives: 7-9 semester credit hours

The plan must include sufficient upper-division courses to total 45 upper-division semester credit hours.

Fast Track Baccalaureate/Master's Degrees

For students with strong academic record who intend to pursue master's studies at UT Dallas, accelerated BS/MS Fast Tracks are available. After Fast Track admission to an MS program, students may take up to 15 semester credit hours of approved graduate courses in their senior year to use toward completion of both the BS and MS degrees. The available Fast Track options and their admission requirements, if any, in addition to having completed 90 or more semester

credit hours (out of which 36 hours are from the core curriculum) with a cumulative GPA of at least 3.00, are as follows:

- [MS in Molecular and Cell Biology](#): Students must have a GPA of at least 3.20 and have completed [BIOL 2311](#), [BIOL 2312](#), and [BIOL 2281](#), or equivalent courses.
- [MS in Biotechnology](#): Students must have a GPA of at least 3.20 and have completed [BIOL 2311](#), [BIOL 2312](#), and [BIOL 2281](#), or equivalent courses.
- [MS in Bioinformatics and Computational Biology](#): Students must have a cumulative GPA of at least 3.20 in all mathematics and statistics courses.
- [MS in Data Science and Statistics](#): (Only Data Science and Applied Statistics specializations)
Students must have a cumulative GPA of at least 3.20 in all mathematics and statistics courses.

Interested students, after reviewing the [UT Dallas Fast Track policy](#), should contact their undergraduate advisor and the graduate advisor of the intended MS program well in advance of their junior year to prepare a course sequence permitting maximal advantage and apply to the Fast Track program.

Degree Planning

Upper-division biology courses taken at other institutions may be included as part of the degree plan subject to the provisions of the section on Transfer Admissions.

Major-related courses may not include more than 9 semester credit hours (BS) or 6 semester credit hours (BA) of upper-division transfer credit and not more than 3 semester credit hours (Biology major) or 6 semester credit hours (Molecular Biology major) of individual instruction (e.g., [BIOL 3V90](#), [BIOL 3V91](#), [BIOL 3V96](#), [BIOL 4302](#), [BIOL 4390](#), [BIOL 4391](#), [BIOL 4399](#), or [BIOL 4V99](#)).

Students planning a career in a particular allied health profession should consult the school they expect to attend to apprise themselves of the course requirements for admission.

Admission standards for medical and dental schools are set by the individual professional school, whose specific requirements should be reviewed with the help of the UT Dallas Health Professions Advising Center (HPAC). Most professional schools prefer that admission applications be channeled through the HPAC.

1. A required Major course that also fulfills a Core Curriculum requirement. Semester credit hours are counted in Core Curriculum.
2. Six semester credit hours of Calculus are counted under Mathematics Core and Component Area Option and 2 semester credit hours of Calculus are counted as Major Preparatory Courses.
3. Students may choose one of the following calculus sequences: (a) MATH 2413, MATH 2414, and MATH 2415; or (b) MATH 2417 and MATH 2419.
4. Indicates a prerequisite class to be completed before enrolling for upper-division classes.

5. Students who complete PHYS 2421 do not need to complete PHYS 2125.
6. These substitutes for BIOL 4380 require permission of the Biology Undergraduate Faculty Advisor to ensure equivalent training in recombinant DNA analysis.
7. Up to 6 semester credit hours of research may be used in fulfilling the major related course requirement.
